

NEMAT NIFTIYEV

Junior QA Engineer | Manual Testing | API Testing | QA Automation (In Progress)
nemetniftiyev@gmail.com | +994 70 583 53 14 | Baku, Azerbaijan

PROFESSIONAL SUMMARY

Detail-oriented Junior QA Engineer actively transitioning from Manual QA to Automation QA Engineering. Skilled in test case design, functional and regression testing, REST API validation using Postman, and SQL-based data verification. Demonstrated ability to apply structured QA practices in self-directed projects, including designing 50+ test cases, reporting critical bugs, and producing complete test documentation. Brings valuable real-world perspective from operations and management experience — enhancing communication, process discipline, and cross-functional collaboration. Currently training in QA Automation at DevHub Academy.

TECHNICAL SKILLS

TESTING & QA ▶ Manual Testing • Functional Testing • Regression Testing • Smoke Testing • Non-Functional Testing • Bug Reporting • Test Case Design
API TESTING ▶ Postman • REST API Testing • HTTP Methods • JSON Validation • Status Code Verification
DATABASE ▶ SQL — SELECT • JOIN • WHERE • Data Validation
TOOLS ▶ JIRA • Git • GitHub
SOFT SKILLS ▶ Analytical Thinking • Attention to Detail • Team Collaboration • Process Discipline • Documentation

EXPERIENCE

Warehouse System Controller • Burma QSC • CURRENT

February 2026 – Present

- Monitor and validate warehouse system data, ensuring operational accuracy, process consistency, and reporting reliability — skills directly transferable to software QA environments.
- Escalate system discrepancies through structured documentation, applying defect-reporting discipline directly transferable to software QA.
- Apply structured process discipline and data-quality mindset to operational workflows — directly transferable to software QA environments.

Branch Manager • AzCake MMC

September 2025 – November 2025

- Managed day-to-day branch operations, team coordination, and workflow efficiency — developing leadership, prioritization, and organizational skills applied directly to QA team collaboration.
- Identified and resolved operational issues with structured root-cause analysis, translating to effective bug investigation and defect reproduction practices in QA.

QA PRACTICE & PROJECTS

QA Manual Tester — Self-Directed Practice

Manual Testing • API Testing (Postman) • SQL Validation • Test Documentation | February 2026 – Present

- Designed and executed 50+ structured test cases covering functional, regression, and smoke testing scenarios, simulating real-world QA workflows from test planning through test closure.
- Identified and reported multiple critical defects with reproduction steps, expected vs. actual results, and severity classifications — following industry-standard bug reporting practices.
- Validated REST API endpoints using Postman — executing GET/POST requests, analyzing JSON responses, and verifying HTTP status codes.
- Performed SQL-based data validation using SELECT, JOIN, and WHERE queries to verify backend data integrity and confirm application correctness.

EDUCATION

Bachelor's Degree

Heydar Aliyev Military Institute, Baku | 2021 – 2025

CERTIFICATIONS & TRAINING

QA Automation Engineering — DevHub Academy, Baku | April 2026 – Present • IN PROGRESS

QA Manual Engineering — Ingress Academy, Baku | February 2026 – April 2026

LANGUAGES ▶ Azerbaijani (Native) • Turkish (Native) • English — Intermediate (B1)
